Main Building - San Antonio, TX

Your Custom Aluminum Window and Door Manufacturer

Custom aluminum windows and doors are designed, engineered and manufactured by Saint Cloud for commercial buildings of distinction, where aesthetics and performance are essential mandates of design.

Your Choice for Historic Replication

At Saint Cloud, we understand the importance of keeping the historic integrity of a building intact as well as the need to apply modern technology to satisfy today's demands for sustainable architecture.

Our historic narrow-sightline fixed and projecting windows have received approval by the U. S. Department of Interior, National Parks Service, as a steel replication window matching historic sightlines and dimensions. This is an absolute must for any project seeking tax credit for historic renovation.

Not only can we help you meet the compliance requirements for historic tax credits, but we will also meet the thermal, structural, acoustic, and ADA compliance requirements demanded of modern buildings.

Historic Replication

We work with you to ensure the historic features of your building are reflected in the form of modern materials delivering high performance. We manufacture an extensive catalogue of products designed to be historically accurate and replicate the features of landmark properties where strict attention to detail is the mandate.

Windows

We have over 60 years of experience of replicating steel and wood windows, matching historic sightlines and dimensions. Available for awning, hopper, casement, hung and fixed applications, as well as floating vent fenestrations, with narrow sightline and profile designs.

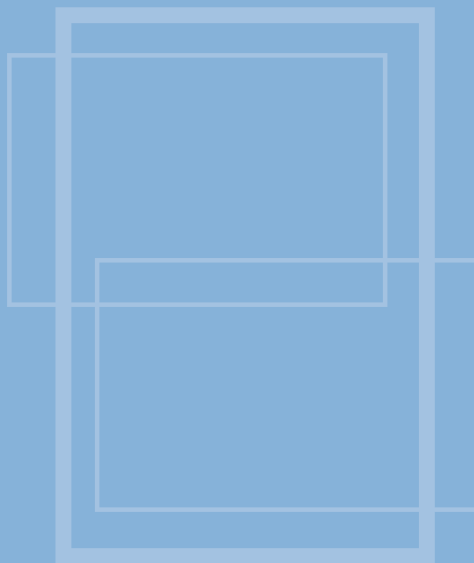

Terrace, French, and Sliding Glass Doors

Our doors are held to the same precise standards as our windows. The sightlines and styles are designed to meet the historic needs of your building. We work with you to ensure the historic features of your building are reflected in the form of modern materials, delivering high-performance to portals that other manufacturers simply cannot achieve.

Hardware and Finishes

A complete line of muntin shapes, mullions, interior trims, exterior panning and hardware options are available to replicate the features of landmark properties where strict attention to detail is imperative. All products are either anodized or painted in virtually any color and with the option for dual finishes with the interior finish a different color than the exterior finish.
